CONSULTANCY...

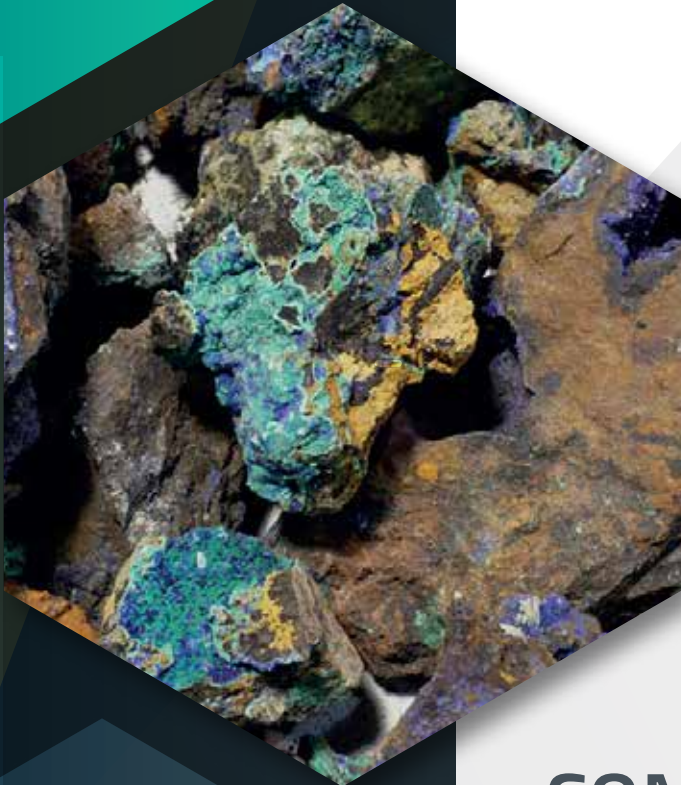

TRANSPARENCY FOR ALL..

The mining industry today comprises of globalised businesses and national business practices and compliance constraints. In other words, international business partners are often speaking similar business Languages, but the deal is still between them and the local bureaucratic practices and regulations of each country/market.

We are ready to provide solutions from market research to production in key emerging markets. As your broker partner, we find the best business to you with the shortest possible business cycle and minimum number of intermediaries.

*"To give real service,
you must add
something which cannot
be bought or measured
with money, that is
sincerity and integrity."*

Douglas Adams
Cambridge Professor and Author

BROKERAGE

While the exact role and function of commodities brokers are conceptualized and operationalized differently in various sectors and settings, a key feature appears to be the facilitation of knowledge exchange or sharing between and among various stakeholders, including researchers, practitioners, and policy makers.

After synthesizing our expertise and adapting information for use in different local contexts, BRM is ready to offer a wide variety of assets.

MINES

CONCENTRATES

METALS

GEMSTONES

Compliances, Partners and more...

Our company's regulatory compliance describes the goal that our organizations aspires to achieve in the efforts to ensure the awareness of and take steps to comply with relevant laws, policies, and regulations. Due to the increasing number of regulations and need for operational transparency, BRM is increasingly adopting the use of consolidated and harmonized sets of compliance controls.

This approach is used to ensure that all necessary governance requirements can be met without the unnecessary duplication of effort and activity from resources.

GIA
GEMOLOGICAL INSTITUTE OF AMERICA®

Founded in 1931, this nonprofit institute is dedicated to research and education in the field of gemology and the jewelry arts. GIA's mission is to protect all buyers and sellers of gemstones by setting and maintaining the standards used to evaluate gemstone quality.

The National Department of Mineral Production (DNPM) is a Brazilian federal agency under the Ministry of Mines and Energy, with headquarters in Brasília, Distrito Federal, district and throughout the national territory, with representation by superintendents and federal police stations.

Siscomex
Sistema Integrado
de Comércio Exterior

SISCOMEX is the Brazilian Integrated Foreign Trade System and is short for "Sistema Integrado de Comércio Exterior." It is used to register foreign merchandise transactions (imports and exports)

This system, which was originally created in 1992, allows the government to have full supervision of international trading in Brazil and enforce current and new laws that are applicable to international trading.

EXPERTISE ANALYSES

We are in full compliance with the International Chamber of Commerce (ICC; French: Chambre de commerce internationale), which is the largest, most representative business organization in the world. Its 6 million members in over 100 countries have interests spanning every sector of private enterprise.

International Chamber of Commerce
The world business organization

Our Story

How did we get here?

Our history initiates at the heart of the mining business, with gold mining and prospecting. In 2011 Brazil Mining was founded by Dennis Suerdieck and Pablo Sena, and their vision of exploring the mineral abundance of northeast Brazil with innovative processes on prospecting and mining gold. After three years of learning operations Brazil Mining spotted a new business opportunity given the lack of transparency, organization and innovation on mining trade. Migrating to brokerage and consulting, Brazil Mining has become an important player as a bridge between national and international clients looking for mining business solutions.

Today BRM represents a comprehensive network of supply and purchasing clients, focusing especially at ore, gemstones and asset brokerage. We aim to nurture solid relationships based on transparency and trust because we understand those are critical elements to succeed in the mining business.

We learned that a group does not necessarily constitute a team. Teams normally have members with complementary skills and generate synergy through a coordinated effort which allows each member to maximize their strengths and minimize their weaknesses. A team becomes more than just a collection of people when a strong sense of mutual commitment creates synergy, thus generating performance greater than the sum of the performance of its individual members.

Let's make international mining business more innovative together!
